

Recovery of p&b in Germany

Heiko Fröhlich, Harald Grossmann

Sofia, 26.10.2007

collection systems for recovered p&b in Germany

- in Germany 4 different collection systems are established
- in the majority of cases 2 or more of them are used parallel

blue bins

curbside collection

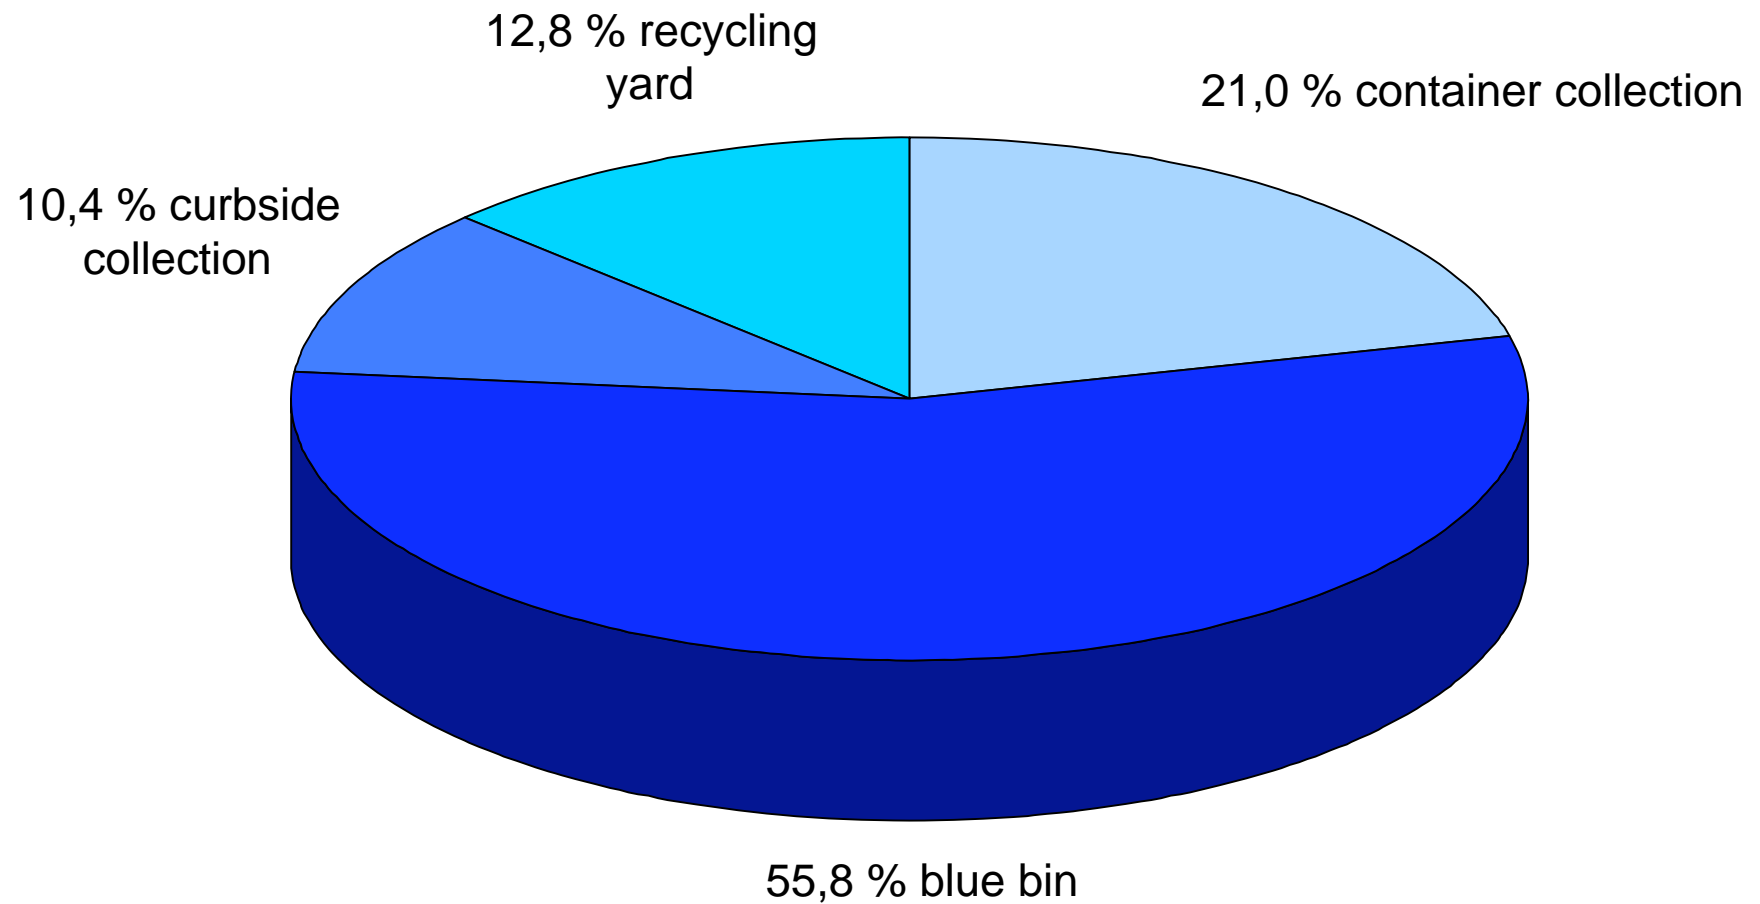

container

recycling yard

Utilization of collection systems for recovered p&b in Germany 2006

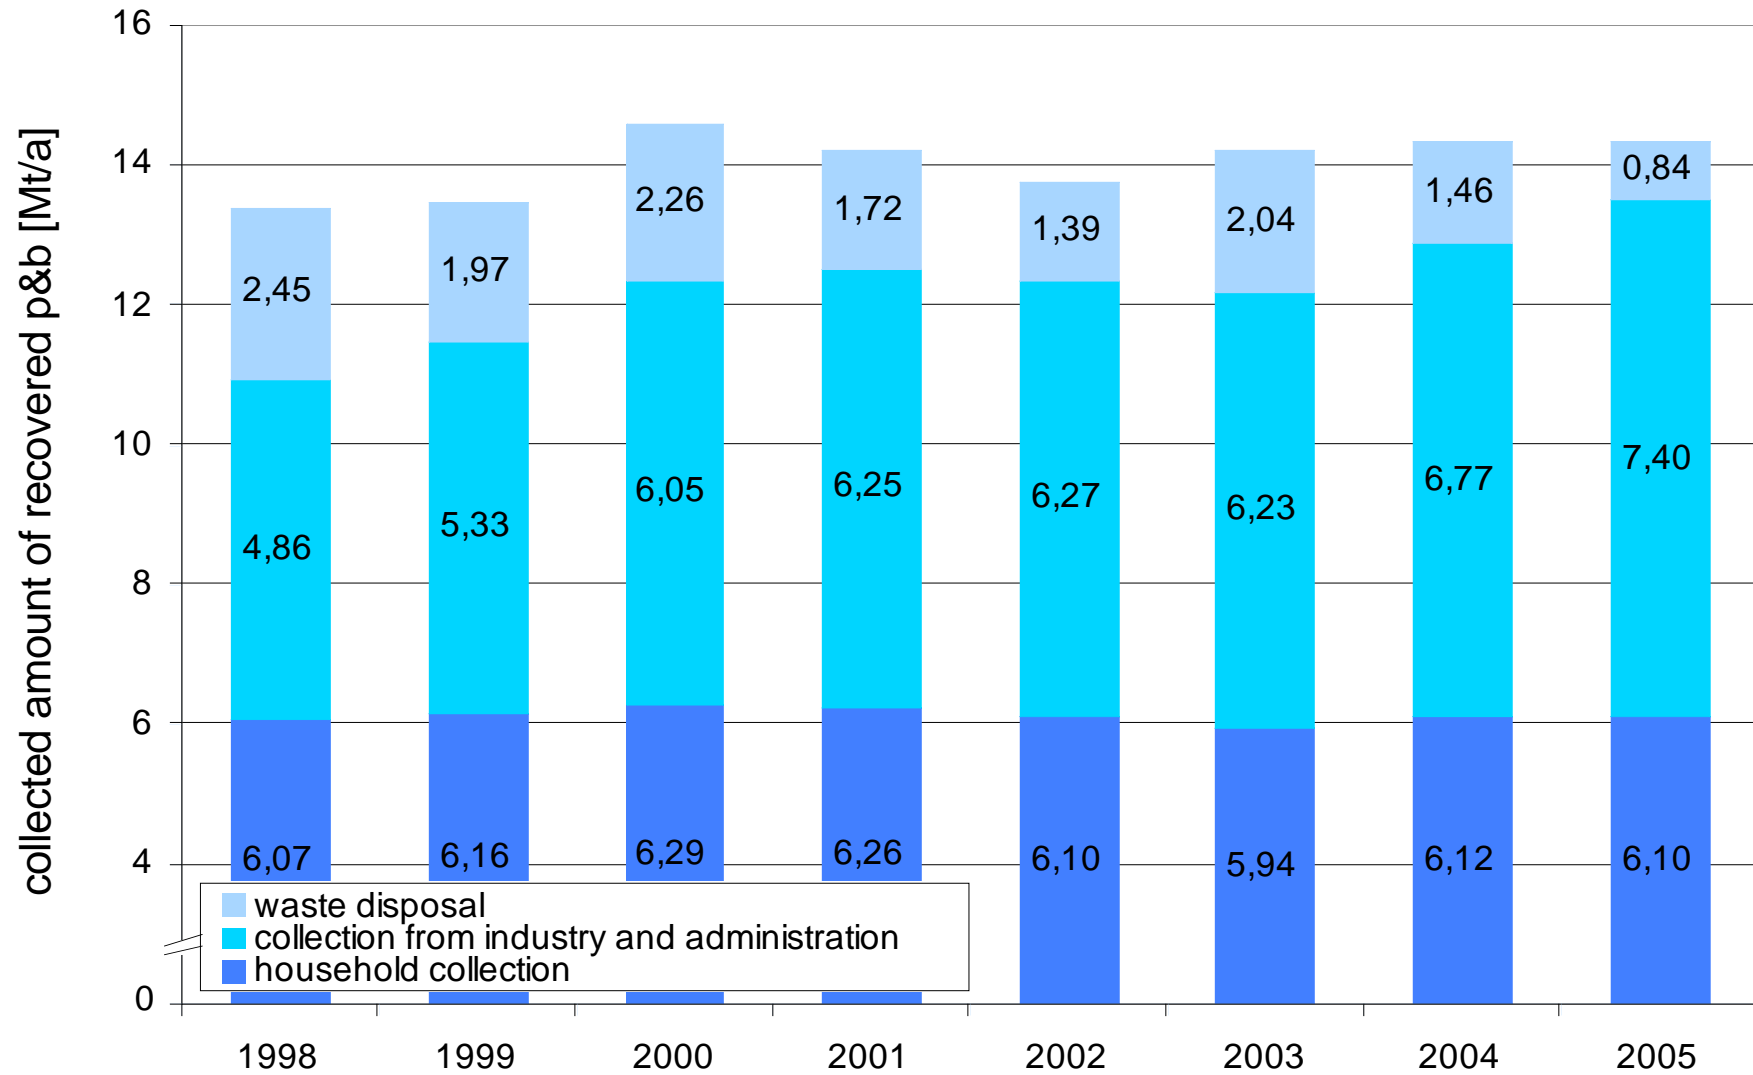

experiences with collection systems for recovered p&b

experiences	container	blue bin	curbside collection	recycling yard
acceptance by citizens	high	high*	medium-high	medium-high
collection costs	low	medium	medium-high	high
paper quality	medium	medium	high	very high
separate collection of p&b possible?	yes	no**	yes	yes
disadvantage	contamination of the environment	additional bin necessary	influence on cityscape	transport by citizens necessary

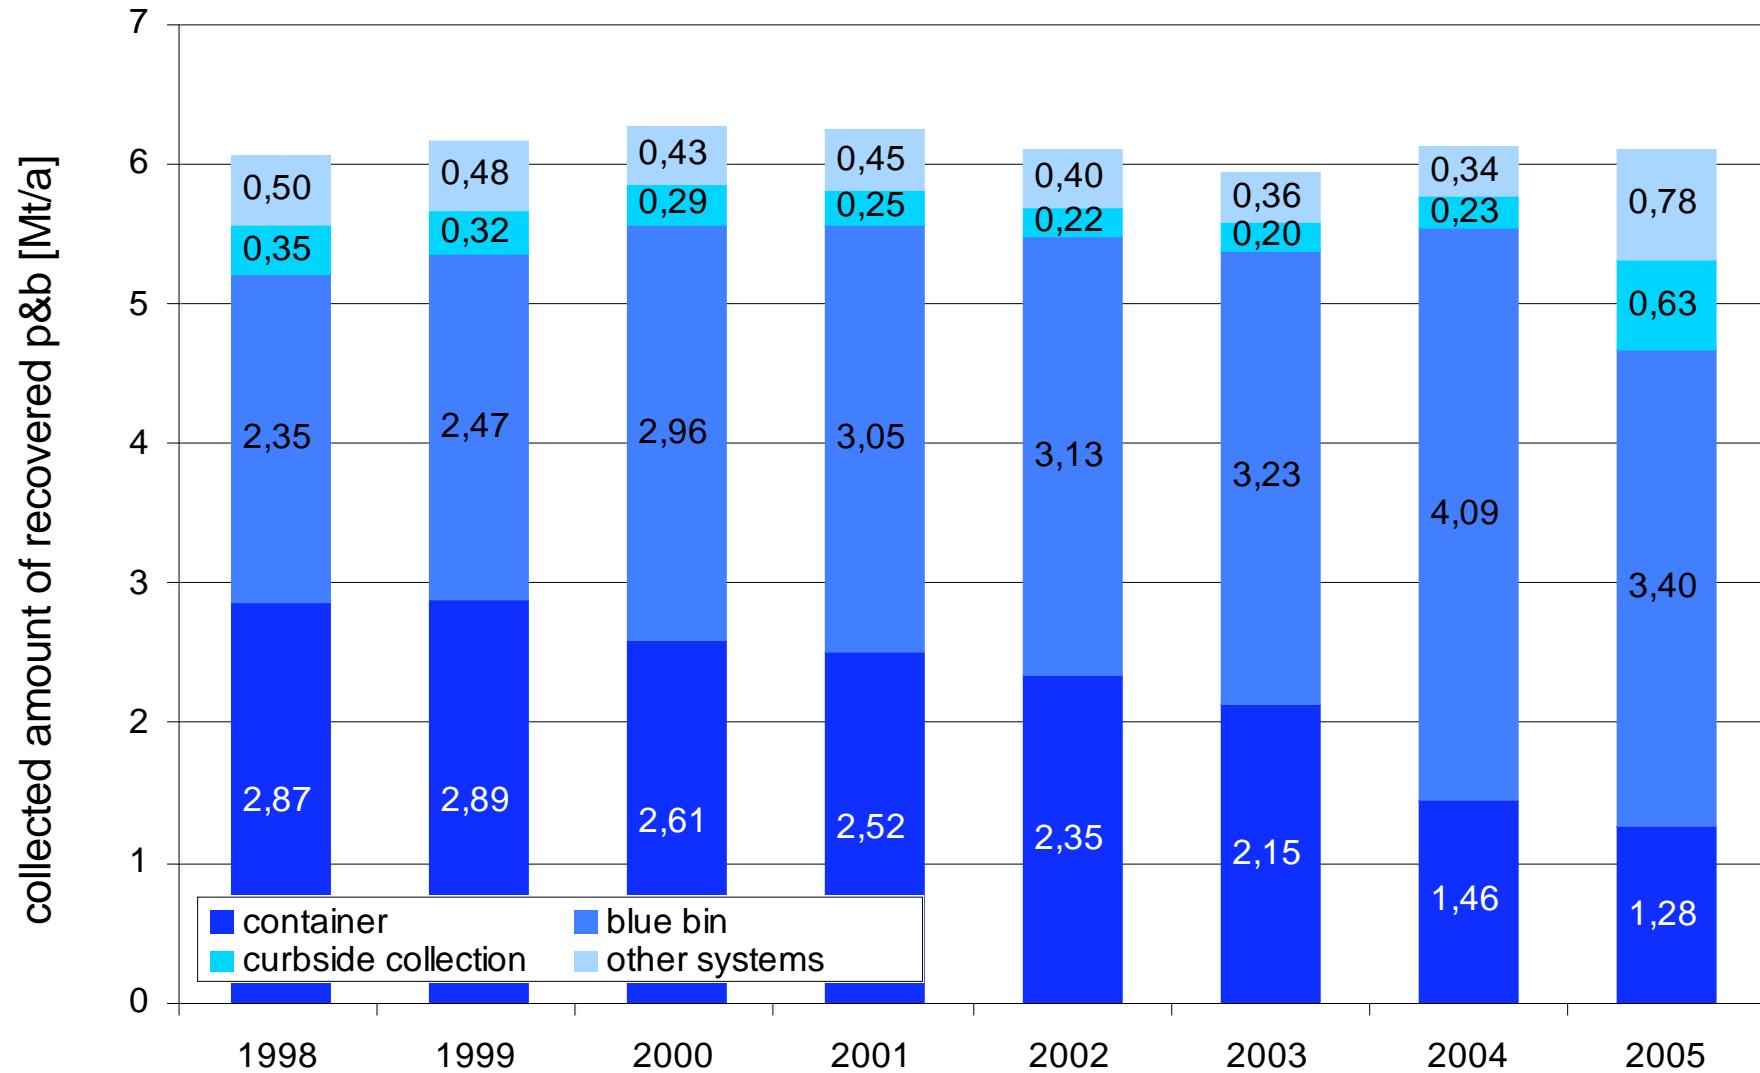

* higher than container

** one more additional bin necessary (two overall), no acceptance by citizens
